

# Wista TechDays: Discover Technologies That Increase Blasting Efficiency

## Why Attend Wista TechDays

Wista TechDays is a professional event focused on technological innovations in abrasive blasting. The program combines live technology demonstrations, presentations of industry innovations and case studies from real projects.

The goal of the event is to showcase solutions that help companies improve operational efficiency, reduce operating costs and optimize technological processes.

Participants will gain an overview of current industry trends, experience technologies in practice, and discuss specific solutions with experts and industry partners.

Participants will also receive a **10% discount on products ordered during the event.**

**Date:** May 13–14, 2026

**Location:** WISTA – Dlouhé díly 414, Zlín – Louky

## What Will Your Company Gain

You shouldn't miss this event if you:

- are involved in **industrial abrasive blasting** and want to learn about innovations that can significantly reduce your operating costs
- specialize in **mobile blasting** and are looking for technologies and methods to cover larger surfaces in less time, with lower abrasive consumption and no compromise on quality
- are interested in new technologies, innovations and developments in blasting, coating, and surface treatment

The event will showcase dry and wet dustless blasting using AmphiBlast technology, safe and comfortable blasting control via the BAABS console, the differences between pressure hold and pressure release systems, the new WISTA app for operational monitoring, blasting cabinets and other technological innovations that can bring economic benefits to your operations.
